## ABOUT ME

I love solving problems and finding logical solutions. Programming turned my curiosity into a career, where I can combine creativity with technical skills to build and improve things.

I have a passion for challenging my mind with logic games, capturing moments through photography, and exploring nature by hiking in the mountains. I also love traveling to new places and experiencing different cultures, as well as the freedom of biking through scenic routes.

## PROJECTS

**FREEDAYQUIZ** Frontend: Nextjs and  
Interactive tailwind. Backend:  
Trivia Platform Node.js, socket.io. Data  
Mar. 2024 - Nov Base: prisma, MySQL.
